Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/595,129	Applicant(s) NAKAMURA, TADASHI	
	Examiner Paul Huber	Art Unit 2627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 is rejected as being indefinite because the claim recites a write-once recording medium, the write-once recording medium performing a process. A recording medium cannot by itself perform a process. Appropriate correction is required.

Claim 8 is rejected as being indefinite for being dependent upon a claim rejected as being indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 8 is rejected under 35 U.S.C. 102(e) as being anticipated by Gushima et al. (US 2008/0304391).

Gushima et al. discloses a method for reproducing a write-once recording medium, comprising: a data area 102 and a disc management information area 207, the data area 102 includes a spare area 402, 403 and a user data area 401; disc management information for managing the write-once recording medium which is recorded in the disc management information area (see paragraph 0067); a plurality of physical addresses assigned to the data area (see figure 8); a plurality of logical addresses assigned to the user data area (see paragraph 0144); at least one track is allocated in the user data area; the disc management information includes track management information for managing that at least one track; and the track management information includes a last recorded address indicating a location at which data is last recorded in a track (see paragraphs 0179 – 0183). Note: the write-once recording

Art Unit: 2627

medium according to claim 7 is the recording medium described in the preamble of claim 7 or those elements listed before the recitation of process steps of claim 7.

Gushima et al. further discloses a method of reproducing the write-once recording medium, comprising: a step of reproducing the disc management information from the disc management information area; and a step of reproducing a user data from the spare area or the user data area based on the replacement management information. See figure 8.

Claims 1-6 are allowed.

Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
